The image displays several overlapping screenshots of the MegaPOS software interface. On the left, the 'General Backoffice System' window shows a navigation menu with options like Maintenance, Inventory, Wholesale, Report, and Administration. A 'Sales Volume - Time Distribution Report' is visible, featuring a line graph showing sales volume over time. In the center, the 'General Retail System' window shows a 'Retail' menu with options for Sales, Stock, and System. On the right, a detailed 'Retail' transaction screen is shown, displaying a list of products with columns for Product Code, Product Name, Qty, Unit Price, Disc, and Amount. Below the list, there are fields for VIP information (VIP Name, Expiry, Stamp Qty, Expiry Date), Total Qty, and various payment and discount amounts. The bottom of the screen features a grid of function buttons like Menu, Search, Delete, F9-Vip, F7-Clear, Suspend, F12 Payment, F4 Confirm, Exit, and Octopus payment.

**MegaPOS** is an integrated sales management and inventory control management system designed for small to large retailers, single or multi-branch chain stores. MegaPOS system is not only fast, your salespeople can learn the system in only a few hours without any previous experience.

MegaPOS can improve efficiency and profitability in retail stores and is suitable for nearly any type of retail environment. Functions include product management, inventory control, sales analysis, accounting, order entry, customer relational management, serial number tracking, and more.
